## L'ascensore

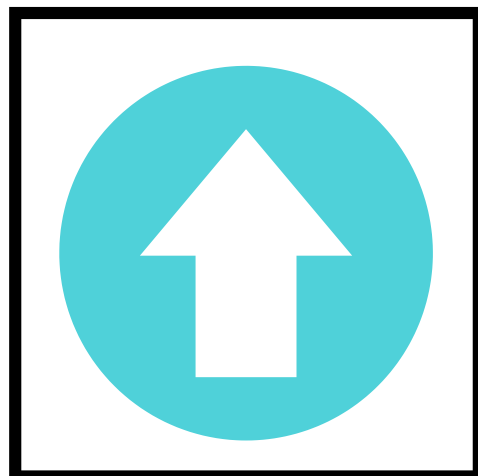

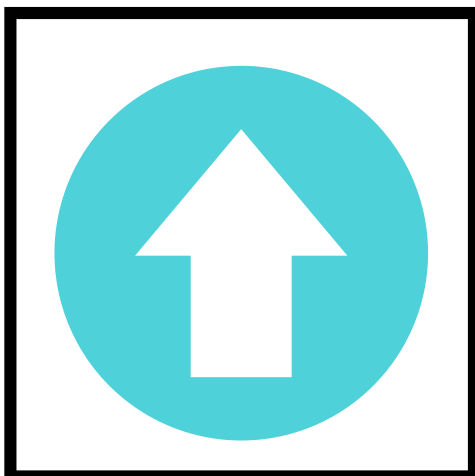

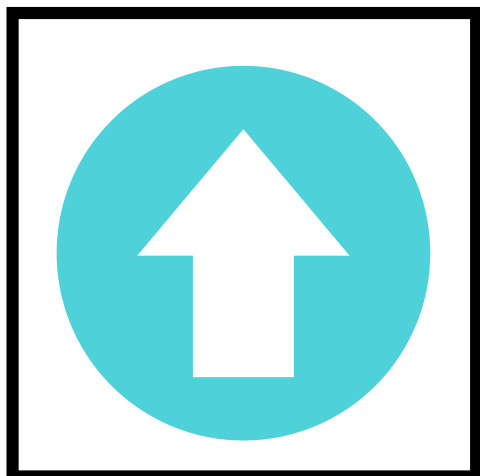

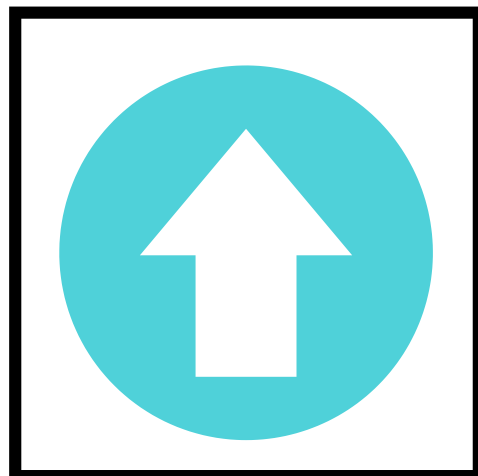

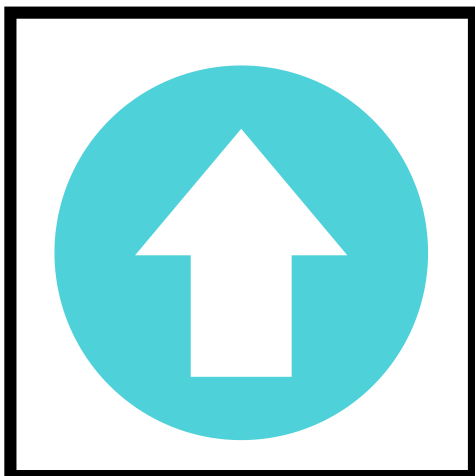

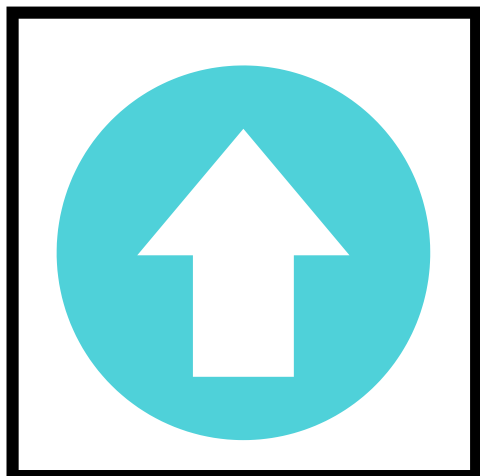

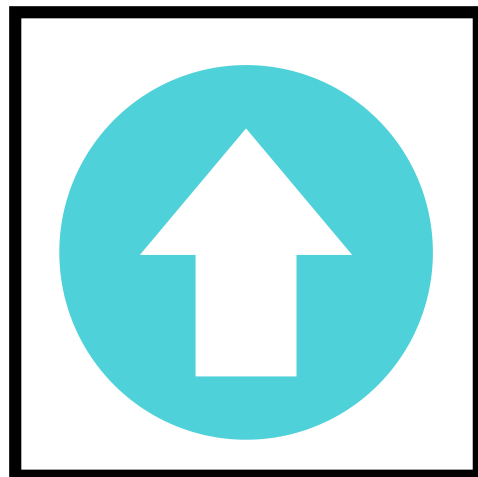

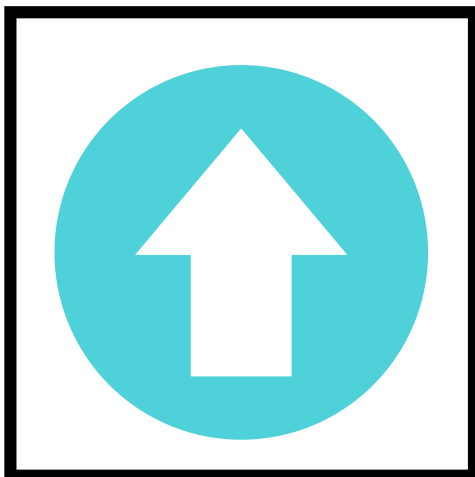

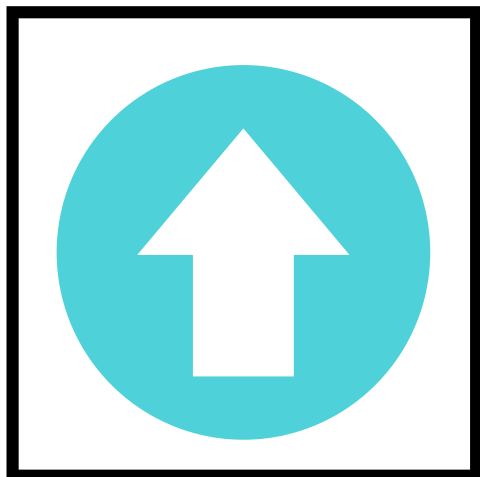

Prendendo spunto da un'attività del software "Autoregolare l'attenzione", ti propongo questa attività per lavorare su attenzione sostenuta, flessibilità, memoria di lavoro.

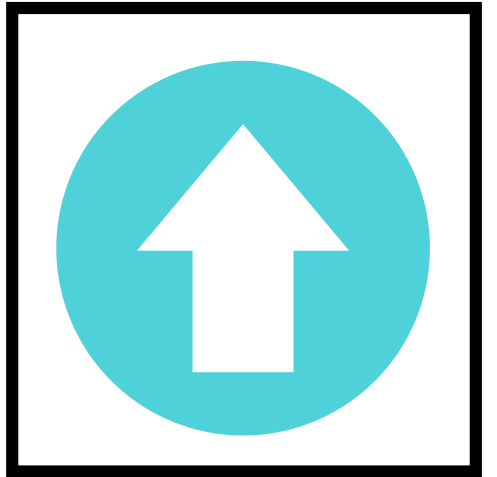

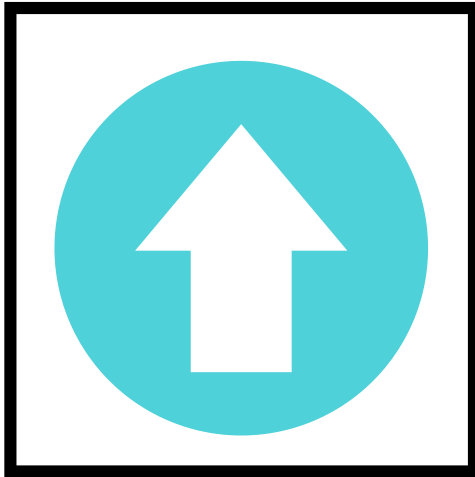

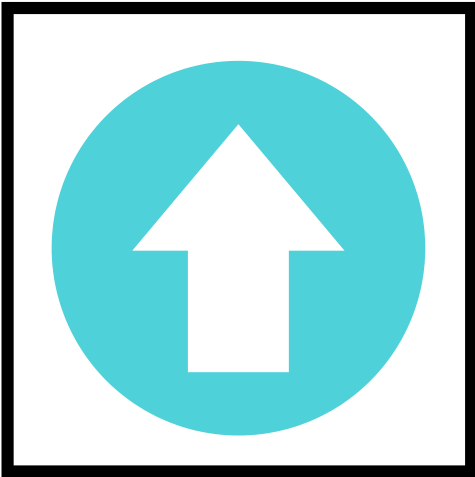

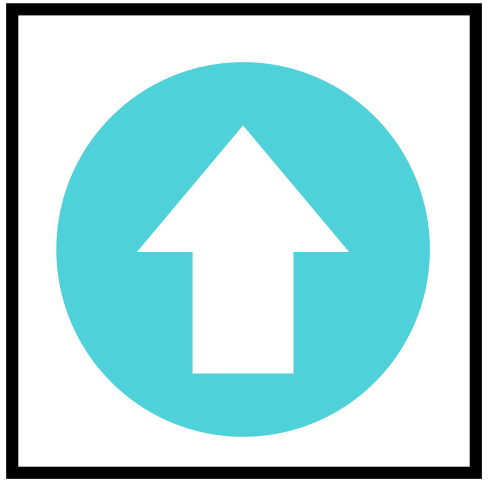

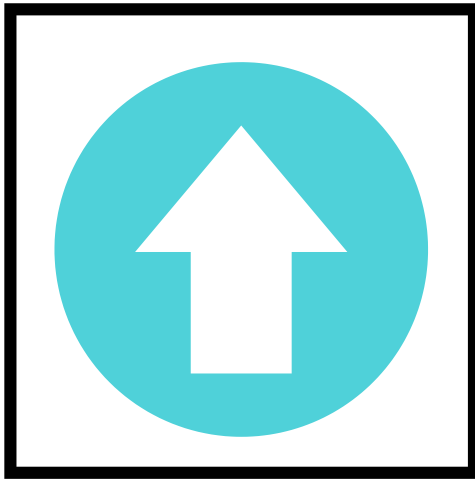

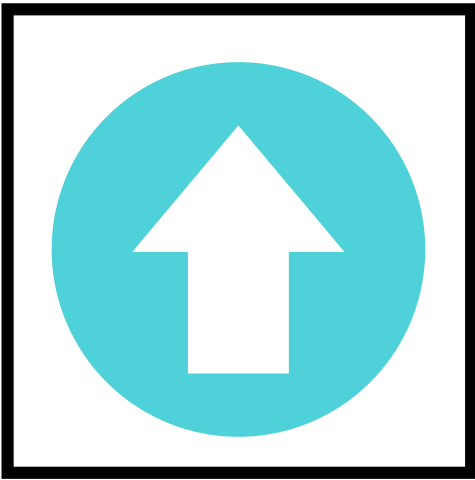

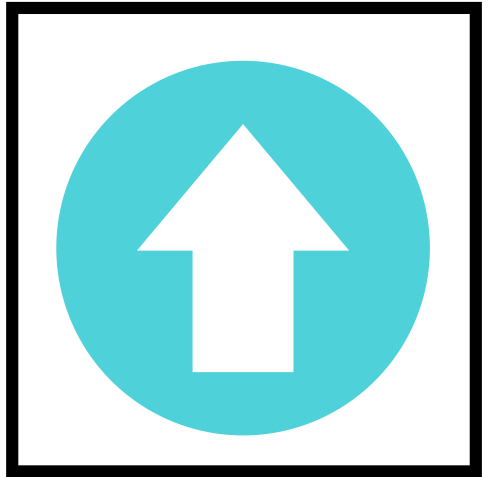

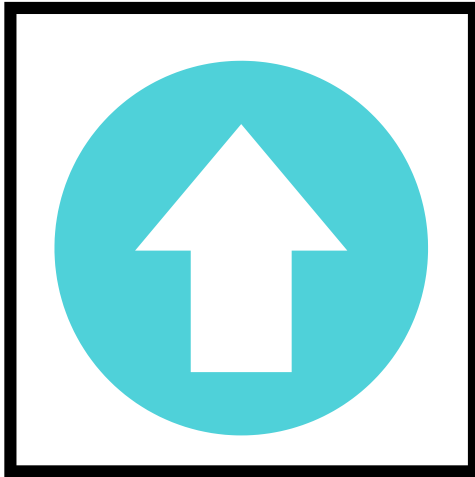

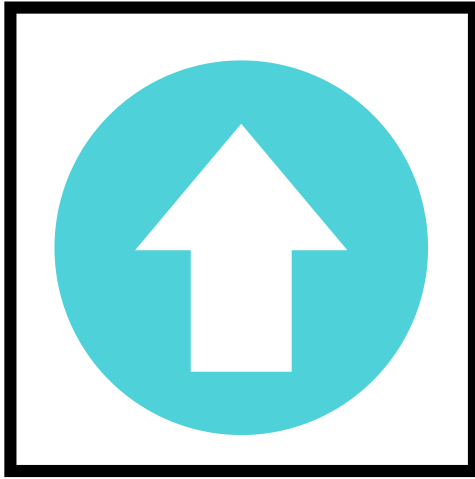

Si parte mostrando al bambino la carta dell'ascensore, che rappresenta il piano terra; dopodiché si mostreranno una dopo l'altra le carte con le frecce su e giù (precedentemente sistemate) e si chiederà al bambino di tenere il conto dei piani scesi e saliti. Alla fine il bambino dovrà dire a che piano è arrivato l'ascensore.

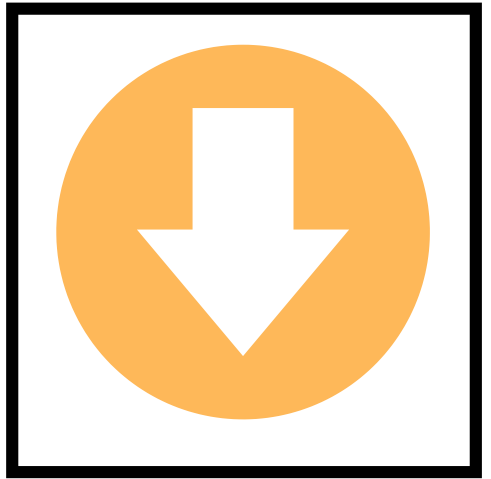

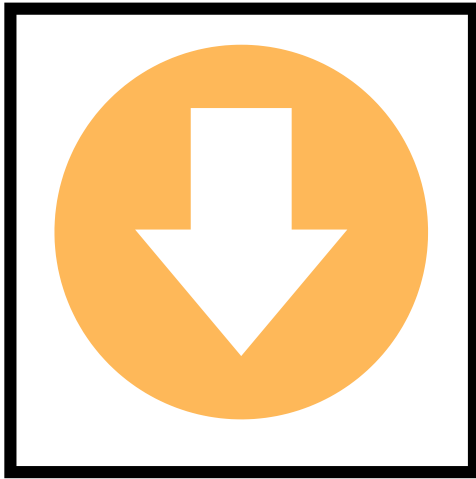

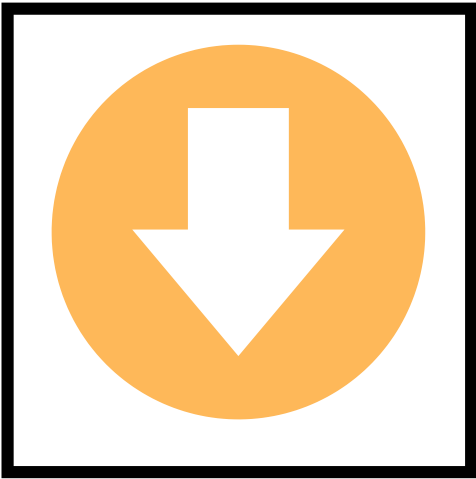

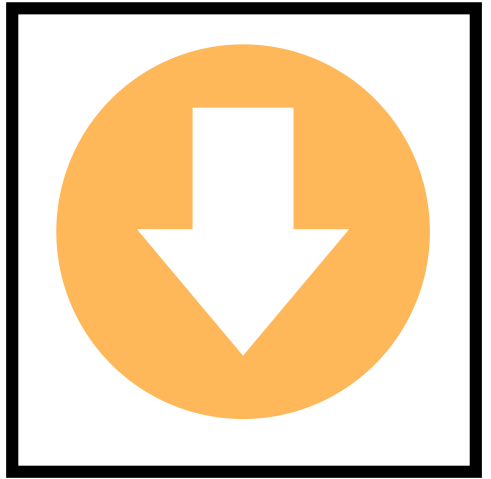

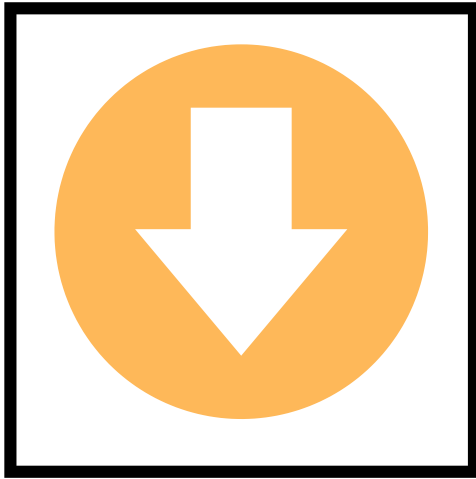

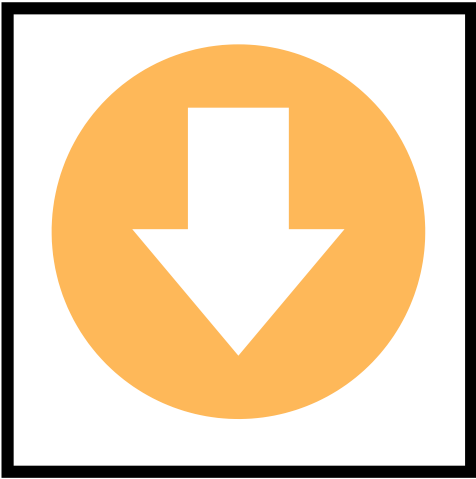

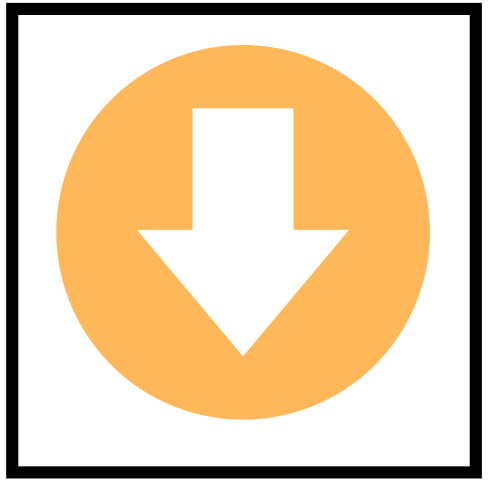

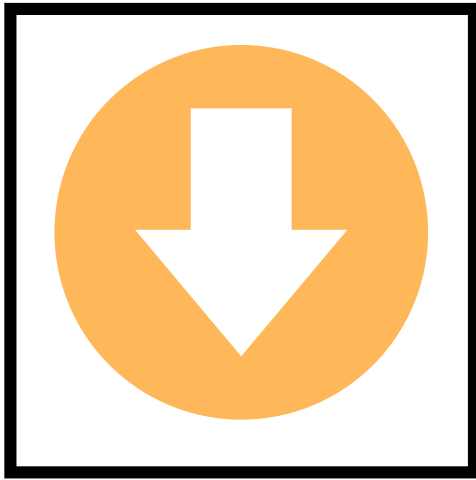

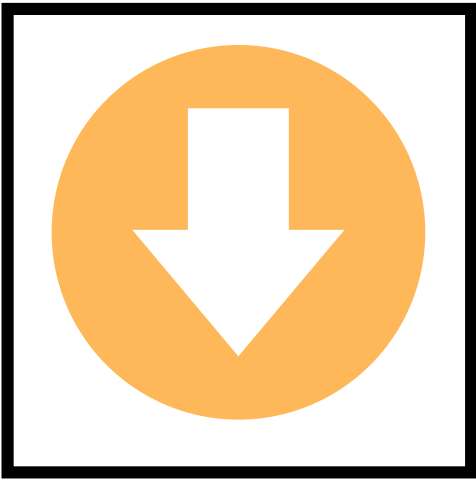

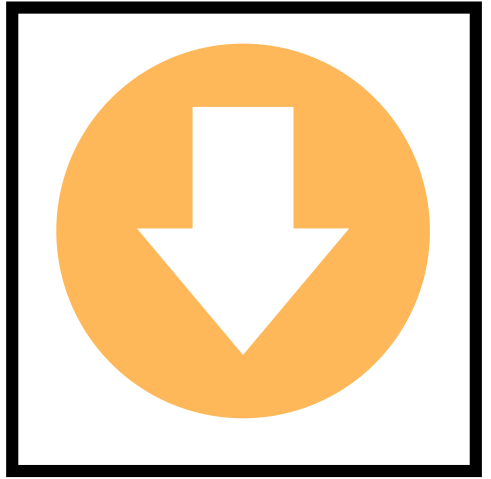

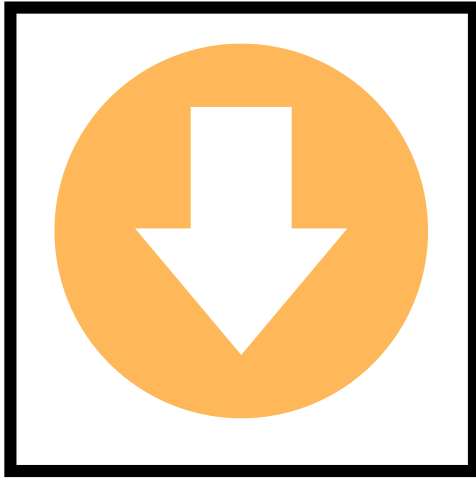

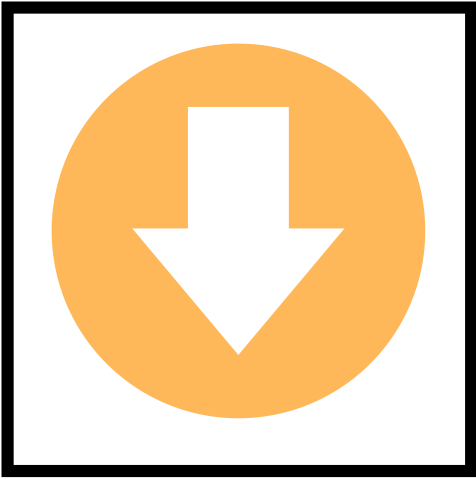

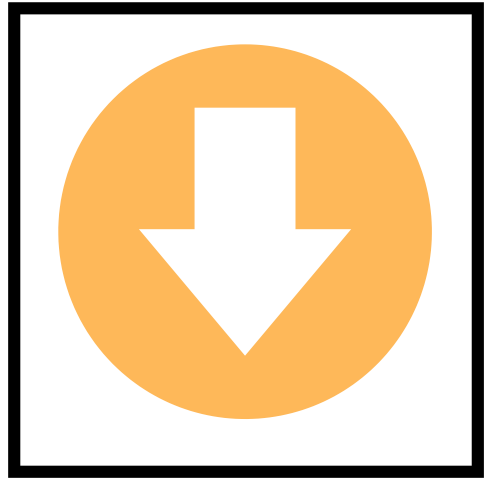

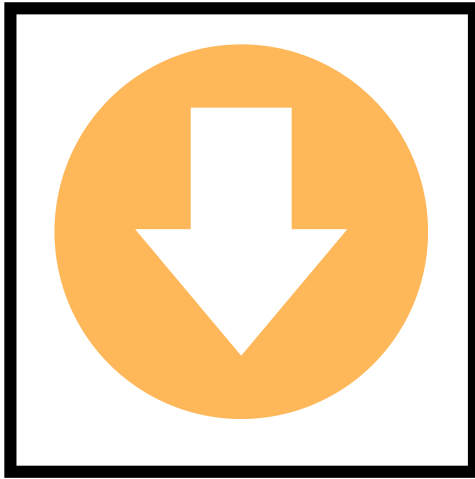

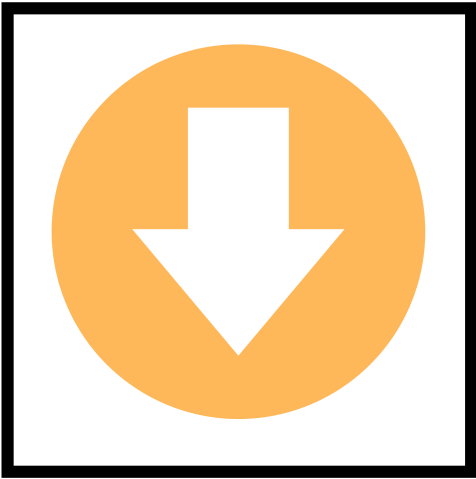

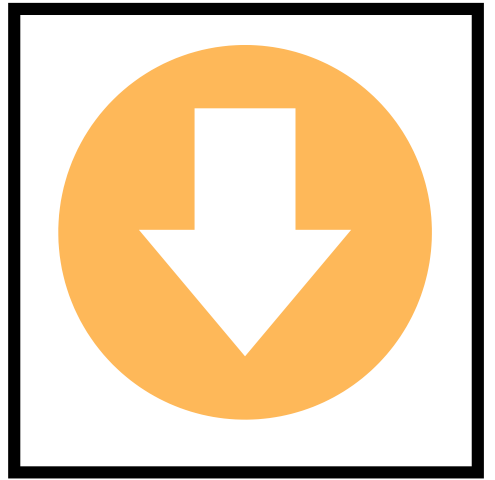

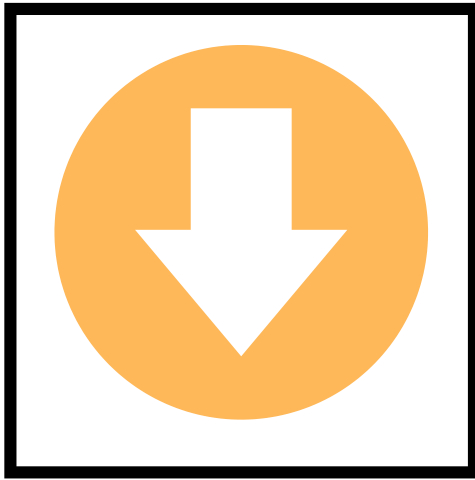

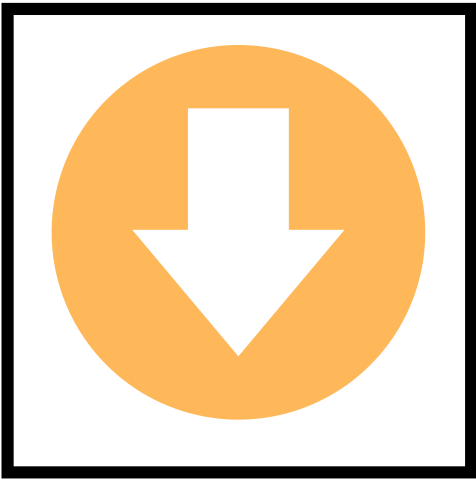

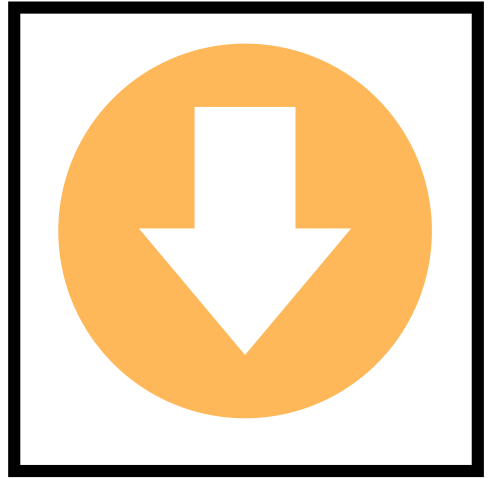

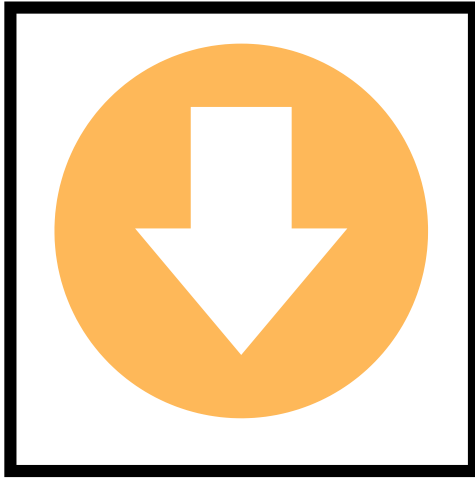

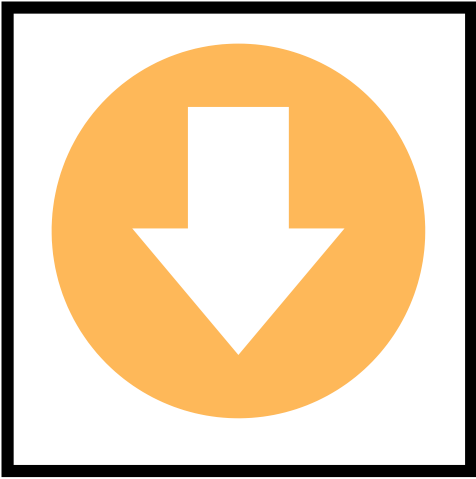

A quale piano è arrivato l'ascensore?
